CONTENTS

José Luis Flores and Miguel Sánchez. Geodesic connectedness of multiwarped spacetimes	1
Bruce Calvert. Neural networks with an infinite number of cells . . .	31
Hongjun Gao and Jaime E. Muñoz Rivera. Global existence and decay for the semilinear thermoelastic contact problem	52
Fabio Antonelli and Andrea Pascucci. On the viscosity solutions of a stochastic differential utility problem	69
John Cagnol, Irena Lasiecka, Catherine Lebedzik, and Jean-Paul Zolésio. Uniform stability in structural acoustic models with flexible curved walls	88
S. Carl and S. Heikkilä. Elliptic problems with lack of compactness via a new fixed point theorem	122
Wenming Zou and Shujie Li. Infinitely many solutions for Hamiltonian systems	141
Nakao Hayashi and Pavel I. Naumkin. A quadratic nonlinear Schrödinger equation in one space dimension	165
Lyonell S. Boulton. Spectral behaviour of a simple non-self-adjoint operator	186
Seung-Yeal Ha and Shih-Hsien Yu. Wave front tracing and asymptotic stability of planar travelling waves for a two-dimensional shallow river model	230
Enzo Vitillaro. Global existence for the wave equation with nonlinear boundary damping and source terms	259
Ryuji Kajikiya. Multiple existence of non-radial solutions with group invariance for sublinear elliptic equations	299
